

The Benefits of Adding OpenVoice Integrated Audio

Seamlessly add toll-free numbers to your GoToMeeting, GoToWebinar and GoToTraining sessions.

Our communication solutions are made to let you collaborate when and how you want to, and part of that offering is providing audio options for affordable and reliable entry into meetings, webinars or training sessions. When VoIP and toll-based phone calls aren't enough for your business needs, toll-free and international audio options give you easy and affordable access to global markets.

"It's important to provide a toll-free number and high-quality audio service so we can impress our audiences."

Steve Klipp, Executive Vice President
Commercial Operations,
PremierTox

Providing toll-free numbers for meetings, presentations and trainings is a nice business gesture to prospects, customers and webinar/training participants calling in from locations around the country and globe. OpenVoice Integrated adds a toll-free phone option to your GoToMeeting, GoToWebinar and GoToTraining sessions, so anyone anywhere can listen in without cost concerns.

If you run a global company, work with people in different countries or want to expand the audience you attract to your online events, you might be interested in offering international numbers to your conference participants. International calling makes collaboration affordable for everyone involved. We offer international plans for both toll-free and toll-based calling, and international numbers are available in over 50 countries.

Benefits of bundling OpenVoice Integrated and web conferencing

- **Integrate audio and web easily.** OpenVoice Integrated works seamlessly with GoToMeeting, GoToWebinar and GoToTraining.
- **Set up your meeting and audio bridges in one click.** With audio and web controls together in a single online interface, it's easy to control all aspects of the session.

- **Decrease total audio costs.** Eliminate the need for and cost of separate audio conferencing services by adding OpenVoice Integrated to your GoTo sessions.
- **Record sessions easily.** Seamlessly record your sessions and capture audio from VoIP, toll-based and toll-free calling.
- **Impress your participants.** Project a professional image by providing participants both a toll-free number and a VoIP alternative.

Bundled audio and web conferencing is the most affordable way to facilitate online collaboration. And with local and toll-free numbers in over 40 countries, international audio lets you reliably expand your business borders by providing a cost-effective way to meet with, present to and train global audiences.
