

GoToMyPC: Total Mobility

Work from whatever mobile device you choose.

Key benefits

- Instantly access your Mac or PC desktop from your smartphone or tablet.
- Turn your tablet into a laptop — access functions it normally won't support.
- Increase employee productivity and flexibility.

"I was blown away by GoToMyPC for iPad. I can start a calculation or a plan and then go to Starbucks and check on progress from my iPad."

Colin Sims

Director of Advanced Treatment Planning, Accuray

GoToMyPC is the fast, easy and secure way to instantly connect to your Mac or PC from anywhere — including from your tablet or smartphone. With access to all of your files, programs and network, it's like having your office computer in your pocket.

When you have an "oh no!" moment after hours, you don't have to rush to the nearest computer. Whether you use an iPad, iPhone, Android device or Kindle Fire, you can access your Mac or PC and get work done on the go.

How it works

All you need is a free GoToMyPC app on your iOS or Android device and a GoToMyPC subscription installed on your host computer. The GoToMyPC app is available free of charge from the App Store, Google Play, the Amazon Appstore and Samsung Apps.

After downloading the GoToMyPC app on your preferred device, simply open the app, log in with your email and password, select the host computer you wish to access and tap Connect. You will be prompted for your access code, then instantly connected to your computer. If additional security features are required for your account — like one-time passwords or 2-step verification — you will be prompted for these credentials.

Feature details

Remote access: Unlimited access to one or more computers. Easily work on your files, programs and network from your mobile device. Use Microsoft Office, ERP, CRM, POS and other software from your iPad or iPhone.

Optimal performance: Powered by our industry-leading technology, you can connect to your Mac or PC in seconds and enjoy real-time in-session performance that lets you get work done on the go.

Easy to set up and use: No need to type the IP address of your Mac or PC. Works through firewalls.

Intuitive gestures and touch controls:

Control your Mac or PC using the mobile gestures and touch controls. Quick visual reminders of supported gestures are available on the toolbar.

Zoom and pan for detailed work: Zoom up to 300% of your screen size and pan across the screen by swiping your finger so you can do detailed work remotely.

Full keyboard: Use special keys like Alt, Ctrl and Tab just as you would on a Mac or PC. Plus, use shortcuts like Ctrl + C to copy, F1-F12 functions keys and Page Up/Down.

Connects over 3G, 4G and Wi-Fi: Based on your connectivity, you can adjust performance for better speed or appearance in session so your work is not slowed down — even if your connection is. (PC host only)

Requirements

For your mobile device:

- iOS: 5 or newer
- Android: 2.3.3 (Gingerbread) and up
- 1 Ghz or higher processor (recommended)

For the computers you wish to access:

- GoToMyPC subscription (free for 30 days at www.gotomypc.com)
- “Always on” Internet connection (cable, ISDN, DSL or better)
- PC: Windows XP and above
- Mac: Mac OS X v10.6 (Snow Leopard) and above

Secure, encrypted access: All data is protected by secure connections with 128-bit AES encryption. Access to your Mac or PC is protected by two levels of authentication — a password and an access code. Authentication using SMS-based 2-step verification codes and one-time passwords are also available.

Keyboard locking and screen blanking:

Prevent others from using the mouse or keyboard or viewing the monitor of the computer while you are remotely accessing it from your device. (PC hosts only)

Multitasking and inactivity timeout: Use other applications, with GoToMyPC still open. After a period of inactivity, GoToMyPC automatically disconnects to save on network use and to prevent unauthorized access. The timeout period is customizable for PC hosts.

Multi-monitor capability: View everything shown on your remote desktop, even across multiple monitors.

Free 24/7 support: Get technical support any time you need it and receive free software upgrades for the life of your account.

Download the free app

Visit the App Store, Google Play, the Amazon Appstore or Samsung Apps to download the free GoToMyPC app. Please note that you'll need a subscription or trial account of GoToMyPC installed on your host computer to use the app.
