

# The password solution for businesses.

LastPass Business balances the competing priorities of IT teams – and the employees they support. From safely storing passwords to managing employee permissions, LastPass Business helps businesses of all sizes remove password obstacles and fix dangerous password behaviors.

## The convenience users expect.

### Store everything in one place

Give employees what they want: One easy place to save all their credentials and one-click login to their web services.

### Remember one password

Employees create and remember their master password, while LastPass remembers all the rest.

### Let LastPass save and fill for you

LastPass stores, fills, and creates passwords automatically, saving employees time and hassle.

### Organize work and personal

Log in with any password throughout the day, and sort passwords to the right place automatically.

### Generate strong passwords

Let LastPass create long passwords for employees, so every web service is protected by a unique, strong password.

### Share passwords conveniently

Eliminate shared spreadsheets with easy – and secure – password sharing that keeps everyone up to date.

### Give universal access

LastPass works everywhere employees do, with real-time sync for all desktops, laptops, mobile, and web.

## The control businesses need.

### Centralize admin control

Centralize deployment and management of LastPass from a secure admin portal.

### Customize admin privileges

Ensure any given admin has only the right level of access to manage their tasks in the admin dashboard.

### Integrate with user directories

Automate user onboarding and removal by syncing with Microsoft AD, Azure AD, Okta, OneLogin, or a custom API.

### Configure custom policies

Customize over 100 policies to ensure employee access is appropriate and secure.

### Automate reporting

Build compliance and maintain accountability with detailed reporting logs that tie actions to individuals.

### Assign group-level permissions

Manage password security and shared passwords with groups created in your directory or LastPass.

### Protect cloud apps

Deploy cloud apps company-wide while employees have access to all apps and web services from one vault.
